Pharmacy Student Debt and Return on Investment of a Pharmacy Education. Investigators: Jeff Cain, Ed.D, MS, Thomas M. Campbell, Pharm.D., Heather B. Congdon, Pharm.D., Kim Hancock, Ph.D., Megan Kaun, Pharm.D., Paul R. Lockman, Ph.D., and R. Lee Evan, Pharm.D.

Evaluating the efficacy of zileuton as adjunctive therapy to current rheumatoid arthritis therapy. Principal Investigator: Dawn Eberwein, Pharm.D. Co-investigators: Pamela L. Stamm, Pharm.D., Thomas M. Campbell, Pharm.D., BCPS, and Howard Vigrass, M.D.

A randomized, double-blind trial to compare the efficacy and safety of anastrozole (Arimidex® 1mg daily) with tamoxifen citrate (20 mg daily) as first-line therapy for advanced breast cancer in postmenopausal women. A multicenter study. Principal site investigator: Charles R. Tweedy, Jr., M.D., Co-investigators: Frank Andrews, M.D., Thomas M. Campbell, Pharm.D., BCPS, and Mary Alice Stacey, R.N., COE.

A multicenter, open-label, 12 week, prospective study to evaluate the effectiveness and tolerability of Lexxel® in hypertensive patients participating in the general registry program who have not adequately responded to angiotensin-converting enzyme inhibitor monotherapy. Principal site investigator: Joseph Lewis, M.D., Co-investigators: Thomas M. Campbell, Pharm.D., BCPS and Dawn Barnes, R.N.

Phase IIIB randomized, open label, multicenter study of Synercid® (quinupristin/dalfopristin) versus vancomycin/nafcillin in the treatment of catheter-related bacteremia due to staphylococcal infections. Principal site investigator: Vincent Nicolais, M.D., Co-investigators: Thomas M. Campbell, Pharm.D., BCPS and Dawn Barnes, R.N.

A triple-blind parallel study to investigate the effect of losartan versus atenolol on the reduction of morbidity and mortality in hypertensive patients with left ventricular hypertrophy (LIFE). A multicenter study. Principal site investigator: Jefferson C. Jones, M.D., Co-investigators: Thomas M. Campbell, Pharm.D., BCPS, Greg Foster, M.D., Bart Rodier, M.D., Debbie Nowlin, R.Ph., and Lynn Chestnutt, R.Ph.

A phase II study of mitoxantrone and fludarabine in the treatment of subjects with non-Hodgkin's lymphoma failing primary therapy with a doxorubicin or mitoxantrone containing regimen. A multicenter study. Principal site investigator: Charles R. Tweedy, Jr., M.D., Co-investigator: Thomas M. Campbell, Pharm.D., BCPS, Study nurse: Mary Alice Stacey, R.N., COE

A randomized comparison trial of two chemotherapy regimens in the treatment of subjects with metastatic breast cancer: mitoxantrone (Novantrone®) and paclitaxel (Taxol®) combination chemotherapy and single agent paclitaxel (Taxol®) chemotherapy. A multicenter study. Principal site investigator: Charles R. Tweedy, Jr., M.D., Co-investigator: Thomas M. Campbell, Pharm.D., BCPS

Comparison of TLC D-99 doxorubicin liposome injection versus doxorubicin injection in metastatic breast cancer. A multicenter study. Principal site investigator: Charles R. Tweedy, Jr., M.D., Co-investigators: Thomas M. Campbell, Pharm.D., BCPS (study coordinator), A. Robert Thiessen, M.D., Study nurse: Mary Alice Stacey, R.N., COE

Developing an antiemetic protocol for the treatment of patients receiving emetogenic antineoplastic agents: assessing the cost-benefit and impact on patient outcomes. Principal investigator: Nathan Holder, Pharm.D., Research Associates: Thomas M. Campbell, Pharm.D., BCPS, Lih-Jen Wang, Pharm.D., Charles R. Tweedy, Jr., M.D.

Therapeutic evaluation of a pharmacist-directed weight-based heparin dosing protocol compared to physician-guided treatment. Principal investigator: James D. Tislow, Pharm.D., Research Associates: Thomas M. Campbell, Pharm.D., BCPS, Natalie A. Norwood, Pharm.D.

A dose ranging efficacy, safety and pharmacokinetic study of single oral doses of RS-25259 for prevention of nausea and vomiting in chemotherapy-naïve cancer patients receiving highly-emetogenic chemotherapy. Principal investigator: A. Robert Thiessen, M.D.; Co-investigators: Charles R. Tweedy, Jr., M.D., Thomas M. Campbell, Pharm.D., James R. Johnson, Jr., R.Ph. Study nurse: Mary Alice Stacey, R.N., COE

A single-dose study comparing ondansetron and granisetron in chemotherapy induced emesis. Principal investigator: Lih-Jen Wang, Pharm.D.; Co-investigators: James R. Johnson, Jr., R.Ph., Thomas M. Campbell, Pharm.D., Charles R. Tweedy, Jr., M.D., and A. Robert Thiessen, M.D.

Comparison of doxazosin versus terazosin in the treatment of symptomatic benign prostatic hyperplasia. Principal investigators: Wade Quick, Pharm.D., Thomas M. Campbell, Pharm.D., John H. Wakeford, Pharm.D., S. Troy Smith, Pharm.D., and James E. Crosse, M.D.

Impact of a clinical pharmacy hypertension clinic on the effectiveness of blood pressure control, patient compliance, and cost of antihypertensive drug therapy in an indigent care patient population. Principal investigators: Lauren C. Duty, Pharm.D., Thomas M. Campbell, Pharm.D., John Wakeford, Pharm.D. and Howard Vigrass M.D.

The effect of trimethoprim-sulfamethoxazole on renal function in elderly patients. Principal investigators: Thomas M. Campbell, Pharm.D. and Dale G. Larkins, Pharm.D.; Co-investigator: Nathan Rawls, Pharm.D.; 1991 - 1992.

A double-blind, randomized, Q12H repeated-dose, parallel-group study to assess the relative efficacy, side effects, and acceptability of controlled-release oxycodone tablets versus MS Contin[®] tablets in patients previously stabilized on strong opioid analgesics for chronic cancer-related pain.
